# MiSAR AIO Manual v1.0

Welcome to MiSAR! If you are reading this, you are probably confused about the functionality or steps to use MiSAR. This manual aims to clear up said confusions in a brief yet effective manner:

Upon first bootup of the program you will be greeted with the following screen:

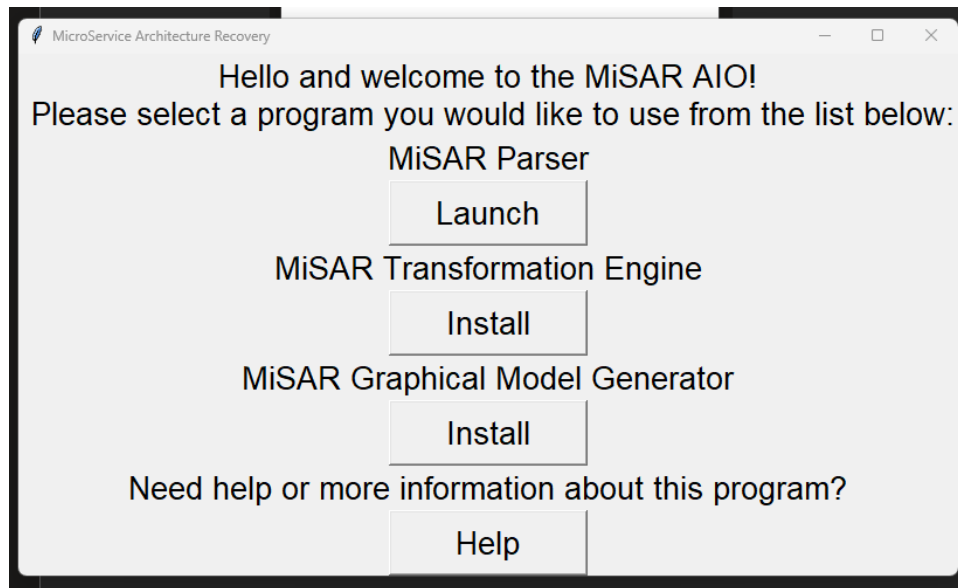

By default, the three programs will not come preinstalled with the AIO.

To use the Parser for instance, you must first install it. Press the button underneath "MiSAR Parser" to install it. Installing it will also install any missing modules or libraries required for fluid operation of the Parser.

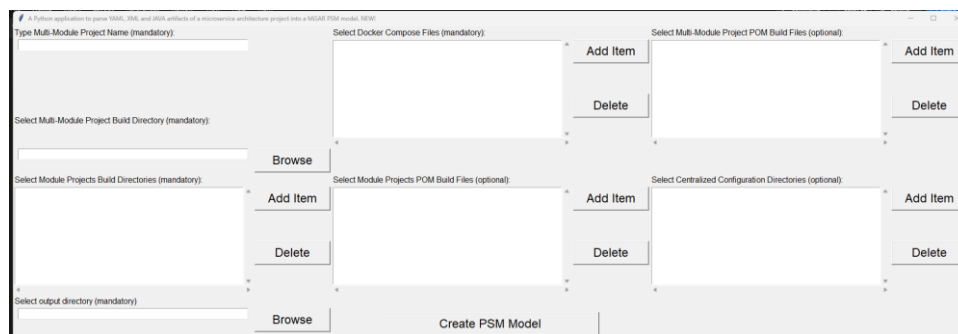

By default, the parser and other components soon to be added or developed will be stored at C:\Users\(YourUser).

Afterwards, you will be able to use the parser:

MiSAR Parser Manual v1.0

Upon launching the Parser, you will be greeted with the UI:

There will be some mandatory fields that need to be filled in for the parser to be able to operate. Once they are filled in, the parser will generate the XMI file to a location of your choice.
